

Eight Easy Installation Steps

1 Using the provided suction cup, gently remove clear lens and paper graphic insert and set aside.

5 Remove paper from pre-positioned double-sided tape and use to temporarily fasten sign to wall for hardware insertion.

2 Again using the provided suction cup, remove black micro dot panel exposing the pre-drilled mounting holes on the inside of sign.

6 Permanently secure sign to wall using the appropriate hardware. Hardware not included.

3 Position sign on wall in the desired location and lightly mark the pre-drilled mounting holes.

7 Reinsert black micro dot panel, making sure it is positioned in the far most positioning slot.

4 Utilizing the marks made in step 3, drill mounting holes in wall and insert anchors where appropriate. Anchors not included.

8 Reinsert paper graphic and clear lens; non-glare side face out.
