

HID Signage

- » ADA Compliant
- » Flat Profile
- » Radius Profile
- » Paper Insert
- » Donor Recognition
- » And More

Don't sacrifice form for function; the HID Sign System provides the best of both worlds. This system can convey the required ADA compliant messages while contributing to the overall design theme of the building's interior surroundings.

The timeless modular design of the HID Sign System creates some of the most functional and visually appealing signage. It also allows for future growth and provides the flexibility to change copy and graphics easily. For these easy changes, use a suction cup to simply remove the non-glare lens and exchange printed paper inserts.

All signage is designed, manufactured and assembled in the USA.
