Our patented Perma-Banner is the outdoor, street pole banner system that looks great for many years because it survives the elements without fraying, tearing, peeling, shredding, cracking or deteriorating.

Our Perma-Banner System is a perfect solution for creating vertical banners that can mount to existing street poles, light posts, various size lamp posts and any flat wall. The system combines strong, lightweight, 1/8" aluminum banner panels with an exclusive "no Fly Away" vertical mounting bracket of extruded aluminum.

All signage is designed, manufactured and assembled in the USA.

STANDARD DESIGN SHAPES

The banner panels can be cut to any desired shape and will not fray, tear, shred, crack, or wrinkle like typical fabric banners. The Perma-Banner System can be sold with our solvent inkjet printed graphics with UV laminate, or get the system with everything but the graphics and apply your own.

Perma-Banner is a "Green Choice" with a wide range of uses offering a long-life investment, maintenance free, with 75% recycled aluminum extrusion and Eco-solvent graphics.
