

Projection Mount Acrylic Signage

RESTROOMS

- » Acrylic Signage
- » Directional
- » Paper Insert
- » 2 Mounting Options
- » Custom Colors
- » And More

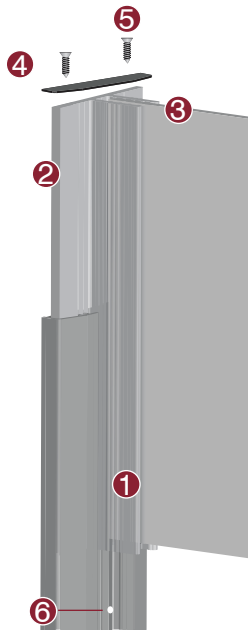

Our Projection Mount Acrylic Signage offers a way to easily identify rooms, elevators, emergency equipment, exits and more. These signs are designed to complement the building and can be made with custom panels to fit any branding needs.

This system can be mounted using our extruded aluminum sleeve or by simply screwing the bracket directly into the wall surface. Both looks offer a secure hold with the acrylic panel being bonded into the bracket prior to installation.

All signage is designed, manufactured and assembled in the USA.

Panel Projection Mounting Bracket and Sleeve Detail

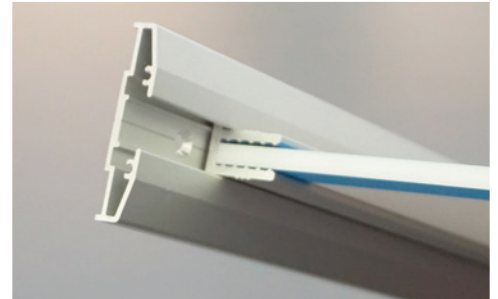

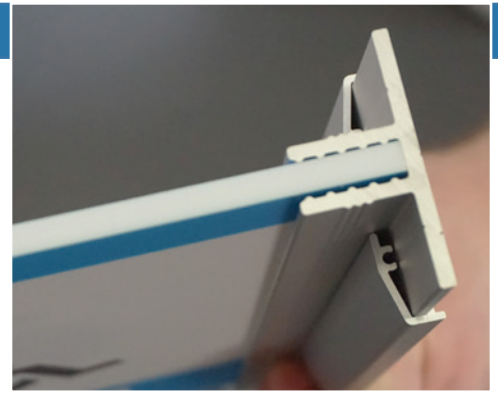

- 1 Panel Projection Bracket Sleeve
- 2 Panel Projection Mounting Bracket
- 3 .25" Thick Sign Panel
- 4 End Caps (2)
- 5 Screws (4)
- 6 Fastener Hole

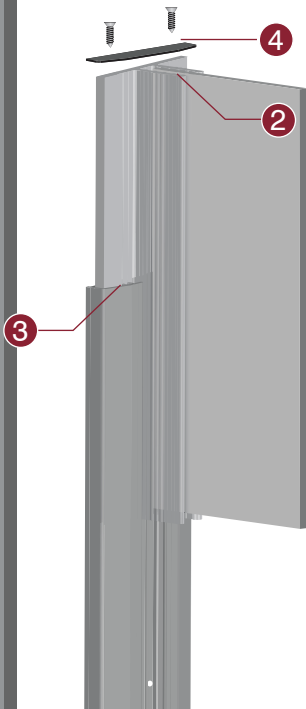

Note:

Panel Projection Mounting Bracket is available with or without accompanying Panel Projection Bracket Sleeve.

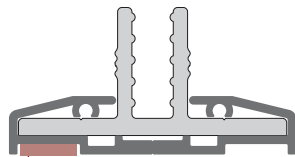

Mounting Bracket and Sleeve consist of Interior and Exterior Grade Anodized Aluminum.

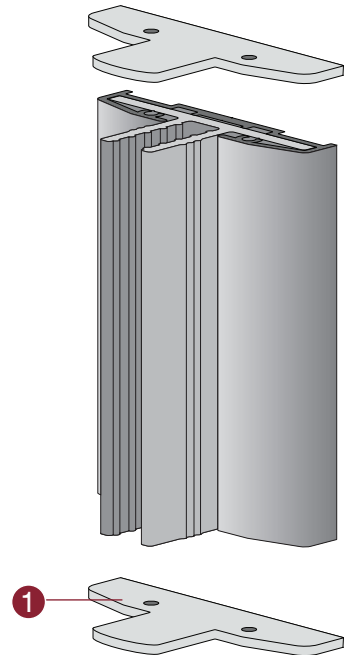

Panel Projection Bracket and Sleeve Mounting Instructions

- 1 Install bottom end cap to sleeve prior to mounting the sleeve on wall surface (using appropriate mounting hardware).
- 2 If you are applying your own panel, use an adhesive silicone to securely mount the panel into mounting bracket.
- 3 Once the panel is secured into the mounting bracket, slide the extrusion into the sleeve.
- 4 Finish the installation with screwing the top end cap on with the provided screws.

Spaces allow for placement of double-sided mounting tape for smaller signs. **Mechanically fastening is still recommended.**
