

Eight Easy Installation Steps

Using the provided suction cup, gently remove clear lens and paper graphic insert and set aside.

Remove paper from pre-positioned double-sided tape and use to **temporarily** fasten sign to wall for hardware insertion.

Again using the provided suction cup, remove black micro dot panel exposing the pre-drilled mounting holes on the inside of sign.

Permanently secure sign to wall using the appropriate hardware. Hardware not included.

Position sign on wall in the desired location and lightly mark the pre-drilled mounting holes.

Reinsert black micro dot panel, making sure it is positioned in the far most positioning slot.

Utilizing the marks made in step 3, drill mounting holes in wall and insert anchors where appropriate. Anchors not included.

Reinsert paper graphic and clear lens; non-glare side face out.

All signs over 3" x 6" MUST be mechanically fastened.
